

# Fero

## Wooden relax chair

**07578** The Fero relax chair is equipped with a relax mechanism that has been especially developed for the care sector. The Classic mechanism can be easily adjusted by pushing yourself off a little from the chair, and this without using any levers. The optional “raising & sitting assist” provides ergonomic support for getting up and sitting down, thanks to the supporting seat movement.

### Support

- 4 beech laminated legs, connected to each other by means of solid beech support beams.
- Glued mortise and tenon joint.
- The sides are firmly connected to each other by means of a solid beech cross beam and a metal frame.
- All edges and corners have been rounded.
- 4 Levina design castors Ø 125 mm on precision ball bearings. The 2 castors at the back legs have central brakes with a directional lock.
- Extending, synthetic footrest with a step safety and with an antiskid structure.

### Seat

- Removable seat, made of a melaminated MDF board of 12 mm.
- Upholstered with fire-retardant in 2 different density zones to guarantee an excellent seat comfort.
- The rounded seat in front stimulates a fluent blood circulation.
- Comfortable seat height of 50 cm.
- The upholstery is finished with imitation leather and decorative stitching.

### Backrest

- Made of an ergonomically preformed plywood shell of 12 mm.
- Upholstered with fire-retardant foam in 3 different density zones to guarantee an excellent seat comfort.
- The upholstery is finished with imitation leather and double stitching.
- Synthetic and ergonomic push bar at the back.

### Legrest

- Made of a plywood board of 10 mm, upholstered with fire-retardant foam and finished with imitation leather.

### Lowerable armrests

- The ergonomic front design of the beech laminated armrests makes it easy to stand up or sit down.
- Standard equipped with dinner tray attachments.
- Two solid axes to adjust the armrests in height in 4 different positions.
- Locked downwards by means of a spring lever.
- In their lowest position, the armrests are on the same level as the seat.

### Classic mechanism

- Easy adjustment in 3 positions, i.e. seat position, reading position, and relax position.
- The relax mechanism first raises the legs, after which it is possible to further incline the entire relax chair.
- Easy to adjust by just pushing yourself off a little, without needing a lever.
- Guaranteed optimal seat comfort in every position: when the chair is reclined, the angle between the backrest and the seat remains constant.
- Optimal leg support, thanks to the telescopic legrest.
- When the chair is put in the seat position, the legrest is turned inwards so that you can stand up without any problem.

### Colours

We would like to refer to our extensive colour gamut.  
Sample card + samples available on request.

### Accessories

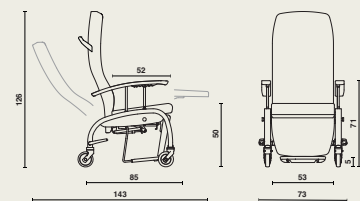

We would like to refer to our  
accessorylist.

### Dimensions

**07578** | Wooden relax Fero:

- L 73 x D 85-143 x H 126 cm
- Seat height: 50 cm
- Seat depth: 52 cm
- Seat width: 53 cm
- Height armrests: 71-50 cm
- Safe working load: 135 kg
